DETAILED ACTION

1. This action is in response to the amendment filed on 01/31/07.

Allowable Subject Matter

2. Claims 1 – 8, 10 – 18, and 20 – 24 are allowed.
3. The following is an examiner's statement of reasons for allowance: The art of record does not teach nor does it suggest the specific features called for in the claims, in particular the concept of normalizing a set of movement parameters uniformly over a color characteristic legend (as shown in Figure 4C of the current application). The majority of ultrasound devices that perform color mapping simply have fixed motion values assigned to particular colors. There are a few that address the need to dynamically assign color values to motion for example previously presented Washburn (6,017,309) and Becker (6,176,828). However, all of the adaptive color mapping teachings focus on accentuating features of interest or avoiding over saturation. None of them try to spread out colors uniformly amongst the full spectrum of motion measurements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
